

wenaCel® sensitive comfort Orthopaedic Pillow

In order to ensure restful and healthy sleep, an appropriate pillow is an indispensable component of your sleep system. The integrated zipper allows you to remove the filling and adjust the pillow to your individual needs. Whether you are a side, stomach or back sleeper, you will enjoy ideal comfort and orthopaedically correct positioning.

Product components:

TENCEL™
is a trademark of Lenzing AG

Characteristics:

- Made from TENCEL™ Lyocell fibres and cotton, quilted with a soft cushion of wenaLoft® comfort fibre
- Filled with temperature and moisture regulating hollow fibres - wenaLoft®
- Sanitized® hygiene function
- Hygienic and hypoallergenic, ideal for asthma and allergy sufferers
- Memory effect: wenaLoft® filling material is especially elastic and recovers its original shape
- Removable filling for individual comfort and support
- Entire pillow washable at up to 60 °C (wash the filling material in the closed inner case)
- Can be tumble dried on cool setting

The wenaCel® sensitive Orthopaedic Pillow provides the correct orthopaedic support for the head and neck area and is designed so that it can be adjusted to individual needs and preferences. Like all other parts of the Wenatex Sleep System, the pillow is made from materials that provide a hygienic sleep environment.

The outside cover is made from TENCEL Lyocell fibre and cotton, used for its breathability, durability and softness, with the Sanitized hygiene function throughout for its hygiene and climate regulating properties. An inner case, made from cambric cotton, contains a filling of climate regulating hollow fibres. These fibres offer a high level of elasticity, deliver excellent heat efficiency and ensure great air circulation, providing you with the support and comfort needed for a good night's sleep.
